QUALITY PEOPLE, SMART TECHNOLOGY SOLUTIONS

What we do

A single point of contact for cost-effective, managed technology services.

Itec's Managed Business Services address technology challenges in your business processes, and then manage the operational implementation of that solution as a service.

We are a Level 1 B-BBEE accredited vendor providing all the services your business needs in one place, including document management, communications, and security, which all have the option of being cloud-based and mobile.

Our team has both strategic and operational expertise in the hardware, software and technology powering these services. After identifying your requirements, our team suggests the most cost-effective combination of owning, integrating or renting the systems that will run your technology, then we manage them for you so you can build a mobile, agile, connected business.

- ✓ Certified Level 1 B-BBEE
- ✈ 47 offices across Southern Africa
- 🏆 Partnerships with SA's leading Tier 1 Network Providers
- 📦 Importer and distributor of leading technology brands
- 🌱 First to offer a Certified Carbon Offset Programme
- 🎓 National Resolution Centre

ITEC Managed Business Services

Communications

The message is more important than the medium, especially when we have assessed your business to give you access to all the tools of communication you need. PABX, mobile, video conferencing, data calling and connectivity... whatever works for your business to get the message across.

Security

We can integrate security into every part of your business so that you are more prepared for disaster recovery, business continuity, more aware of your employee activities and have a solid operational awareness of your technology.

Cloud

We can help you to run your business applications and hardware in the cloud. Since everything in the cloud is more connected, you can securely cross reference and share information across different applications.

Document Management

We can seamlessly integrate cloud-based digital services with your in-house ERP systems, saving a lot of time and money. This way you get all the benefits of systems that can talk to each other, without changing what you already have.

Mobility

Business now happens on the move, whether as the core or an enhancement to your solutions. We can help you see how best to use mobile technology so you can do your business best.

Finance

Our in-house finance solutions offer customers flexible, affordable and accessible finance, managed by highly capable consultants who help to structure any deal simply and efficiently.

Document Management

What Is Document Management?

Document Management oversees the intelligent capturing and managing of your organisation's data.

For example, mobile devices and multifunction printers can digitise documents. Data can be fed into ERP and CRM systems and channeled to the various parts of the company when they need it. Crucial information can be in the hands of employees, even as they sit in front of a customer. A good data management system will transform your business. We have extensive experience in auditing your existing infrastructure, using software such as SyncPlus so we can help build the best document management strategy for you.

Why implement a Document Management solution?

There are great efficiencies to be found if you treat your data smartly, deciding what is relevant now and what should be archived.

This can impact storage investment and result in major savings. Good data management is also core to backups, disaster recovery and business continuity. Don't forget about regulations, compliance and security: all of these can be met with a good data strategy. Being on top of your data makes your company smarter and faster. It can evolve and expand into this new era of opportunities.

A4 Mono Single Function

A4 Mono MFP

A4 Colour Single Function

A4 Colour MFP

✓ Up to 57 ppm

The Lexmark Mono Single Function range of devices is ideal for midsize to large workgroups offering rich features including multiple finishing options.

✓ Up to 57 ppm

The A4 Mono MFP range of devices brings powerful productivity tools, cost-saving workflow solutions and a large, intuitive colour touchscreen interface for amazingly simple access to a rich range of features. This includes duplex scanning, advanced copying and easy user authorisation for enhanced security.

✓ Up to 47 ppm

The Lexmark Colour Laser Printers are machines that combine the functions of a workgroup printer with the simplicity of a personal output device. They have integrated advanced security settings and can print up to 47 pages per minute in both black and white, as well as colour. They also come with the function of duplex (2-sided) printing.

✓ Up to 47 ppm

For high-quality, cost-effective colour that never slows you down, the Itec colour multifunction printer combines, standard wireless connectivity, web browser and touch-and-swipe control convenience in compact dimensions to fit any office space. Simple networking for mixed multifunction printing and desktop environments.

A3 Mono MFP

A3 Colour MFP

Production Printers

✓ Up to 95 ppm

Offering a smart combination of features, technologies and investment for a competitive edge in business production printing. A modular system starting with entry-level hardware costs plus it features energy star awarded green technology.

✓ Up to 45 ppm

The Itec A3 Colour MFP range offers high-speed output printing and scanning to help improve your productivity. It also features advanced system integration options and a built-in print system with a "touch and swipe" interface for customisable operation.

✓ Up to 136 ppm

Itec's Production Printing range adds power, performance and simplicity to any production print application -- up to 136 ppm print/copy output, real-time image density and colour density control sensors, and digital colour imaging to rival offset printers at a fraction of the cost.

Cost Management

Cost Management software applications within the Itec portfolio help your business manage your print output environment, track usage reporting and apply rules to control the cost and usage in line with agreed budgets and requirements.

Service Management

Service Management software enables Itec to remotely monitor your print fleet on your behalf, by receiving remote, automated alerts about technical printer faults, consumables levels and meter readings. This greatly reduces downtime, improves productivity and controls business environment costs.

Content Management

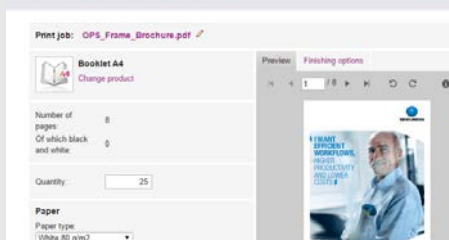

Securely store your business information on-premises, in the cloud or both. Access it instantly from any location, with in-built security ensuring that you control data access, while still enabling compliant document sharing and integration with both your existing systems and the rest of Itec's document management products.

Production Management

Specify your print settings

AccurioPro Flux provides efficient production printing prepress processes. Automate recurring tasks and centralise control of all devices. Access a powerful server that enables you to receive print jobs from clients in your company network and organise print jobs within your team, with comprehensive reports to optimise your printroom. Also available is an online print shop with comfortable 24/7 online ordering.

Productivity

Itec's Productivity software solutions provide tools such as online live chat functionality, helpdesk ticketing, marketing automation, HR applicant process systems, ITIL based service desks, and a pipeline sales management tool. They are powered by cloud-based Microsoft applications for employee productivity anywhere, anytime.

ENABLES MOBILE WORKING

COST-EFFECTIVE DOCUMENT OUTPUT

Itec SyncPLUS is an online health and status monitoring solution that reduces the need for user intervention and boosts system uptime by automating a number of key processes and tasks for your print fleet.

Printer downtime is a massive headache in any office environment. A multifunctional printer (MFP) that unexpectedly experiences a fault or runs out of toner can cost hours of productivity and disrupt workflow for days in a busy office. What's more, out-of-order document output devices are a massive drain on the IT department's time, accounting for an estimated 30%-40% of helpdesk calls in the average organisation. "That is why companies need to put tools such as Itec SyncPLUS in place to stay on top of service and maintenance issues in their document output infrastructure" says Greg Lock, Senior Solutions Architect at Itec SA.

Itec SyncPLUS resolves three core problems that cause strain on office efficiencies:

REMOTE PRINT MONITORING

Itec SyncPLUS was developed by Itec to automate the reporting of common service and maintenance issues of document output devices for reliable performance and accurate billing. This powerful technology allows Itec to manage your infrastructure from a distance as effectively as it could if it had a technician on-site monitoring your devices 24 hours a day.

AUTOMATIC COMMUNICATION

If one of your print devices is about to run out of toner or experiences a technical fault, Itec SyncPLUS enables automatic communication to our support centre allowing us to take action quickly with the minimum amount of interruptions to your workflow or IT resources since we have the information needed at hand to diagnose and repair.

FLEET OPTIMISATION

The device usage data collected by Itec SyncPLUS provides you with everything you need to manage and optimise your print fleet. Powerful analytics presented in human language allow you to understand the behavioral patterns in the data and know where to focus to avoid costly mistakes and control costs.

Benefits of Itec SyncPLUS

EASY PRINT MANAGEMENT

At a glance overview of your print management that saves time while growing your business.

AUTOMATED SUPPLIES ORDERING

Create automated supplies ordering and track existing and potential business, using the supplies replacement features.

SAFE AND SECURE COMMUNICATIONS

Secure and encrypted transfer of non-user, technical-only data between devices and our cloud SyncPLUS servers, offers peace of mind to any security concerns.

ORGANIZE PRINTERS

Organise your printers by mapping them to departments, floors, tags, and location, based on best utilisation trends.

DOWNTIME TRACKING

Track how many hours a device is down using the event logging ability.

AUTOMATIC COUNTER READING

Get reports on scheduled basis with all counters needed for your internal processing. Counters are automatically and accurately collected daily from each device for auditing, billing and reporting purposes.

GOING GREEN

By monitoring power consumption, SyncPLUS offers potential electricity costs savings by suggesting changes to device settings.

ALERTS

Get notified when devices reports any warning or critical alerts including paper jams and supplies low.

REMOTE VALUE ADDED CAPABILITIES

Remote panel access, diagnostics and firmware updates allow our service teams to offer proactive service. Centralised deployment of settings and applications to devices is fully managed to improve the value offering to our customers.

Communications

More Than Just A Call

Connectivity and communications are no longer different things but operate on the same technology foundation.

This creates one business network that is available to nearly any part of the country, whether connecting via fixed line or wireless mediums. The benefits include immense savings and unlocking new levels of collaboration, business intelligence and customer service.

It is no longer necessary to own the equipment and platform, other than the end-user devices such as phones and headsets. Itec will manage your communication needs as a service, reducing costs, streamlining and integrating your systems and improving your clients' experience of your brand.

Connectivity

Future proof and simplify your business's ever-growing and ever-changing technology requirements.

Itec will work with you to assess your solution requirements by looking at and understanding your exact connectivity requirements. We will then propose a solution from our range of APN, Microwave and Fibre products that are customised and scalable, designed to assist in managing and limiting unnecessary network cost. Once approved, we will fully manage the implementation and handover of the installation whereafter it will be supported by our technical expertise.

CLOUD-BASED FUNCTIONALITY

Security 

BUILT-IN, SECURE ENCRYPTION

Mobility 

ENABLES MOBILE WORKING

Our connectivity solutions can be customised to the customer's unique requirements and include:

iLink Connectivity - Your Business' platform for convergence

Itec Integrate is committed to deliver high-quality fibre and licensed wireless connectivity solutions in a range of iLink service options focussed on servicing the enterprise, corporate multi-site, international, SME and SOHO businesses alike. iLink offers a reliable, high-speed connectivity platform for the convergence and management of the simplest to the most complex data, voice and IP based services.

Shared and Private APN - Connectivity anytime and anywhere

Ensure business continuity securely and cost-effectively by providing your workforce with a solution that allows for connectivity anytime and anywhere based on the mobile data, content allowance and confines set by your organisation.

APN is short for **Access Point Name** which facilitates a secure gateway between Mobile networks and other computer networks as well as the public internet. An APN solution allows for multiple SIM cards across various mobile networks (Vodacom, MTN and Telkom), connecting to the Internet via the Itec network, utilising a shared data bundle and governed by a Hosted and/ Onsite Firewall that further enhances the management and security of your users and your organisation.

Itec APN solutions consist of two options:

Shared APN

A Shared APN, allows for direct access to the internet and includes a Hosted Firewall that will allow for general limitations to be set by SIM/user.

Private APN

The Private APN solution will allow for the allocation of a unique Access Point Name, which is a unique identifier that allows mobile devices to connect to their organisation. This APN solution also offers Hosted or Onsite Firewall selection that will allow for customized rulesets and the option to have internet access routed over a current Itec Corporate Network (MPLS).

Cloud  CLOUD-BASED FUNCTIONALITY Security  BUILT-IN, SECURE ENCRYPTION Mobility  ENABLES MOBILE WORKING

Make that call

Depending on your connectivity, business size, location and infrastructure, Itec will customise a voice solution that is service-based, reducing your investment in hardware. After assessing your communication needs, business challenges and existing systems we will propose either a small, medium or enterprise PABX solution that can be financed over 24, 36, 48 or 60 months.

We offer voice products from the MiCloud, MiVoice and MiContact Centre ranges

Mitel 6863 SIP Phone

This 2-Line SIP phone with 2.75" graphical monochrome LCD display, programmable hard keys, and smaller desktop footprint is an ideal option for business environments that have light telephone use requirements.

Mitel 6865 SIP Phone

The Mitel 6865 SIP Phone offers exceptional value in a fully featured, expandable IP phone. It has eight programmable keys, XML capabilities, Expansion Module and native DHSG/EHS support and Gigabit throughput for PC connectivity.

Mitel 6867 SIP Phone

The Mitel 6867 SIP provides remarkable HD wideband audio and an enhanced speakerphone, a large colour LCD display, dual port GigE, six programmable soft keys, four context-sensitive system keys, native DHSG/EHS headset and Expansion Module support.

Mitel 6869 SIP Phone

The Mitel 6869 SIP phone commands the desktop with its large 4.3" colour display, powerful crystal clear HD audio and 12 programmable soft keys. Dual Gigabit Ethernet ports, magnetic keyboard interface, native DHSG/EHS headset support, and choice of expansion modules.

M685 Expansion Module

The M685 features a colour LCD screen and 28 programmable keys, with the ability to scroll through three pages of programmed entries.

M680 Expansion Module

The M680 is compact, cost efficient, and provides 16 additional programmable keys with built-in LEDs.

K680 Detachable Magnetic Keyboard

The K680 Detachable Magnetic Keyboard magnetically attaches to the 6867 and 6869 models to allow easy and quick navigation through features and directories.

Wall-Mount Kit

All Mitel 6800 Series SIP phones can be wall-mounted safely and securely. The wall-mount kit has a two piece slide-and-lock design and includes a short Ethernet cable, making installation simple and efficient.

MiVoice 6920 IP Phone

The MiVoice 6920 IP phone is designed from the ground up for the enterprise user who requires an exceptional HD audio experience via its unique voice optimized handset. It offers a large colour LCD display, dual GigE, programmable personal keys and context-sensitive soft keys, support for both USB & Analog headsets.

MiVoice 6930 IP Phone

The MiVoice 6930 IP phone commands the desktop with its large 4.3" colour display, powerful crystal clear HD audio through the voice optimized handset, programmable personal keys, Bluetooth 4.1 with Mobile Integration, mobile phone USB charging point and choice of expansion modules makes the 6930 the choice of power users.

MiVoice 6940 IP Phone

The MiVoice 6940 IP Phone is designed for executive users who demand a lot from their phone. The 6940 offers a large 7" touch display, powerful crystal clear HD audio through a unique cordless Bluetooth voice optimized handset and programmable personal keys. Mobile Integration, Dual Gigabit Ethernet ports and the full-duplex speakerphone ensure the 6940 delivers a robust, productivity-enhancing executive desktop communication tool.

Voicegate

Your business can enjoy all the functions and features of a traditional PBX without the need for landlines, at a rate you can afford.

Voicegate is a managed IP telephony system hosted in the cloud that enables PBX functions and features associated with traditional PBX solutions. Supported by various connectivity types, this cost-effective and scalable solution allows customers to further benefit from competitive call rates from our range of Voice over IP services that deliver both inbound and outbound voice traffic.

YEALINK T40G

Yealink SIP-T40G is a feature-rich SIP phone that enhances daily interoperability and unifies communications for busy managers. Designed with a revolutionary new appearance, it supports flexible and secure provisioning (the phone utilizes industry-standard encryption protocols for users to provision and perform software upgrades both in-house and remotely), this advanced IP phone is intuitively designed with ease-of-use in mind. The T40G is also built with the Gigabit Ethernet for rapidly facilitating call handling, and its programmable keys help boast extensive productivity-enhancing features, like BLF, SCA, call transfer, etc.

YEALINK T46G

The SIP-T46G is Yealink latest revolutionary IP Phone for executive users and busy professionals. New designs appear the commerce, with high-resolution TFT colour display, delivering a rich visual experience. Yealink Optima HD technology enables rich, clear, life-like voice communications. Supports Gigabit Ethernet, a variety of device connections, including EHS headset and USB. With programmable keys, the IP Phone supports vast productivity-enhancing features.

YEALINK T48S

The SIP-T48S IP Phone is a dynamic business communications solution for executives and professionals. This phone offers a large touch screen that makes switching between pages and applications swift, easy and convenient. The SIP-T48S is also with Yealink's Optima HD Voice technology and wideband codec of Opus for unparalleled audio clarity. Phone users will think they are sitting in the same room with one another. The phone uses Gigabit Ethernet technology for rapid call handling. Plus, it works in conjunction with Bluetooth USB Dongle and Wi-Fi USB Dongle.

Video Conferencing - StarLeaf

Meet better. Meet StarLeaf

StarLeaf offers cloud-based video conferencing services and collaboration tools that create real value for your business. Whether it's one-to-one video calls, small online meetings, large web conferences or chats between teams: StarLeaf's solutions are designed to enhance productivity and provide seamless collaborations.

StarLeaf supports a wide range of industries, and almost any organization can benefit from the communication and collaboration tools that we offer.

Benefits

Easy to install and deploy

User friendly interface

Up to 100 remote attendees per call

Free unlimited mobile applications for every employee

Inter-operable with other standard-based video equipment

5 year next swap-out day warranty

Huddle Rooms

A simple and affordable all-in-one system; purpose built for small meeting rooms. Easy to set up. Comes with microphone, wide-angle camera, Pronto Cable USB, and touch screen.

Conference Rooms

Fully customisable. A complete purpose-built solution. Easy to use. This can be scaled up and down as per the meeting room requirements and size.

Auditoriums

Suitable for very large meeting rooms and auditoriums. Built for professional AV integration. With extra optionals and various accessories custom fit each need.

Only Software

Hardware is not a must when considering StarLeaf. You are able to subscribe to a Business or Enterprise plan without purchasing any hardware.

- Intelligence & Reporting
- Integration options

TMS

- Web-based (ease-of-use & accessible from anywhere/any device)
- Reporting (Real-Time/Historical)
- Budget Barring
- Cost Management
- Integration options

Cloud Services

'The Cloud' is an evolution in how we use technology and make technology give us more for less.

More than simply hosting your data somewhere else, 'The Cloud' gives you the applications, services and data you need, on the technology you desire, without spending huge amounts of money. If you just want a single service or to migrate your entire IT setup, you have the flexibility of choice and a lot of room to expand. Cloud systems can make your processes and applications run better with technology that serves your business directly. This removes the burden off your IT and procurement departments, since your service provider incurs the cost and effort to keep up with the most effective technology.

Since everything in the cloud is more connected, you can securely cross reference and share information across different applications. Itec's Managed Business Services are modular, so we can help you migrate just one, or all of your business systems to the cloud.

Mobility Services

Mobility is one of the most powerful new tools of the 21st century.

Employees can work anywhere, customers can engage where they please and information can now flow freely across the organisation, bridging the walls of silos and bringing immediacy to processes. Not just about smartphones and tablets, mobility represents how technology makes information accessible to your employees and clients.

By partnering with Itec, your employees could take conference calls on the road, have collaboration meetings by sharing documents securely and ensure you are paid on time because the invoice was issued and received without fuss. All of this while you are still in control of where your data is, who has ownership, and what might happen with it.

Security

Keep Your Company, Employees, Customers & Information Safe

Security is about: Who should or shouldn't have access to your company premises. Who should or shouldn't see or share your organisation's information.

COVID-19 has changed the way we look at access control. With new rules and regulations regarding company premises access control Itec has a wide range of products to assist you in ensuring the safety of each individual that need to gain access to your premises.

Sharing information is vital for a business. Customer details, the specifics of deals, competitive pricing, phone calls, emails and many other pieces of information are crucial to gaining and maintaining an edge over the competition. By analysing what is under threat in your business, it is easy to foster a security culture that doesn't inhibit your employees' productivity. Connect with a trusted partner like Itec, and hone your security culture while leaving the heavy lifting to us.

CCTV

Itec can design a CCTV solution that meets all your security needs, from indoor to outdoor, daylight to lowlight. With clear and reliable video proof, your business will be safe from any false liability queries and you will be able to make decisions based on objective evidence.

Our systems include digital auto tracking, multi browser and device support, built-in motion, audio and face detection, remote focus adjustment, a variety of video viewing streams and a clear view of vertical areas.

Access Control - Biometrics

Security is top-of-mind when we propose any of our solutions. Don't compromise the benefits of your employees being able to access data when and where they need it, as well as feed new intelligence into the business. Protect the analytics that allow for new insights into the business landscape and real-time reporting that makes strategic data readily available to act on.

With our expertise, you can build a culture against intrusions and breaches, without compromising your employees' ability to work where and when they need to.

Access Control - Facial Recognition

Authorised access has come a long way from using keys, pin codes, cards, and fingerprints. We now find ourselves stepping into the era of face recognition.

The use of face recognition in access control and time attendance has been an inevitable trend, which creates advantageous "touch-free" experience. With advanced deep learning technology and practical functions, Facial Recognition Terminals bring better security and improved efficiency to access control and time attendance tracking, making them easier than ever!

Access Control - Thermal Solutions

Itec Temperature Screening Solution, with multiple product types and a wide range of applications is designed for the detection of skin-surface temperatures so as to achieve rapid and safe preliminary screening in public areas with high efficiency in a multitude of scenarios.

An approach that incorporates competent technologies, instead of manpower alone, can be a much better choice in many ways. Such an approach is: Safer (Non-contact measurement to avoid physical contact) Faster (One second per person for skin-surface temperature detection) Smarter (AI detection, greatly reducing false alarms)

Security

CLOUD-BASED FUNCTIONALITY

Mobility

ENABLES MOBILE WORKING

CCTV Range

PTZ Camera

The Smart PTZ Dome camera series features HD imaging, smooth Pan/Tilt/Zoom, long range lenses and IR along with smart tracking functions to ensure the elimination of all blind spots within the camera's area of coverage.

Bullet Camera

Outdoor Bullet Cameras are a versatile solution for all of your security needs. They feature a wide range of viewing angles that capture images with high resolution. Most Bullet Cameras are equipped with an IR lamp, which facilitates night time recording.

Dome Camera

Dome Cameras are a versatile solution for all of your security needs, offering both indoor and outdoor options. They feature a wide range of viewing angles that capture images with high resolution. Most Bullet Cameras are equipped with an IR lamp, which facilitates night time recording.

Network Video Recorder

Meeting all bandwidth and storage utilisation requirements, the Smart Pro NVRs support recording of up to 12 MP camera resolution, Ultra High Definition (UHD) output up to 4K, up to 192 TB of storage capacity and H.265+ compression to increase storage space by 50-70%.

Access Control - Biometrics

Readers

Access control readers use different technologies ranging from Biometric to Facial recognition, to perform a variety of functions. Readers can be used to perform tasks like granting access to doors, locking server cabinets and more, making them an ideal component in many access control systems.

Time & Attendance

Time and Attendance devices are perfect for company HR Managers of any small or medium sized business. These devices will work wonders in making your job easier while also making it possible to more closely monitor employee time, thereby saving your company time and money.

Smart Locks

A new generation of smart lock solutions have hit the market. This revolutionary lock offers more than just smart locks, it delivers the ultimate combination of security, convenience and access flexibility in a single lock.

Turnstiles

Turnstiles are compact and cost effective entrance solutions. Designing for smooth and silent operation, reducing power consumption, wear and tear. It is suitable for areas with high traffic.

Access Control - Facial Recognition

Value Series

Value Face Terminals offer limited storage capacity for facial images, but complete access control and time attendance functions. They can be very suitable and cost-effective for medium and small companies and retail establishments.

Pro Series

Pro Series Face Terminals Offers adequate storage capacity for facial images and complete access control and time attendance functions, giving this series the advantages of high cost-effectiveness and high adaptability to different application scenarios.

Ultra Series

With a large storage capacity for facial images, high performance and comprehensive access control and time attendance functions, the Ultra Series Face Terminals offer users and clients an excellent user experience.

Facial Recognition Module for Turnstile

The Face Recognition Modules for Turnstile can easily integrate with turnstiles to provide the user with a complete access solution. The integrated terminal-turnstile solution is particularly useful for commercial buildings, banks and so on.

Access Control - Thermal Solutions

2617B

The bullet camera is a non-contact, long-range and high accuracy product. It is reducing risks of cross-infection. It has an efficient auto alarm triggering that greatly reduces labour costs.

TP21 Handheld

This product is designed for the detection of skin-surface temperatures to achieve rapid and safe preliminary screening in public areas with high efficiency in a multitude of scenarios. Temperature measurement range: 30°C to 45°C. Temperature measurement accuracy: ±0.5°C

TP31 Handheld

The handheld thermal camera, specially designed for body temperature measurement. It's equipped with a 160x120 resolution thermal detector. It helps to quickly detect fever.

Metal Detector

This product is designed for the detection of skin-surface temperatures to achieve rapid and safe preliminary screening in public areas with high efficiency in a multitude of scenarios. AI face detection, multi-target detection. Alarm triggered when the temperature is over the threshold.

Facial Recognition and Temperature Screening

Long-term temperature screening with access control for building related projects. Centralised management for access control with temperature records. Flexible deployment, suitable for various scenarios.

Firewall

100% Cloud Managed IT

Itec offers cloud managed edge, branch, and enterprise-class campus IT solutions to bring simplicity to organisations of every size. With wireless, switching, SD-WAN, security, communications, mobility management and security cameras, all centrally managed from the cloud, we give IT administrators visibility and control, without the cost and complexity of traditional architectures.

MR Wireless Access Points

Access points are built from the highest grade components and carefully optimised for a seamless user experience enabling faster connections, greater user capacity, more coverage, and fewer support calls.

- BYOD policies
- Application traffic shaping guest access
- Enterprise security
- WIDS / WIPS Location analytics

MX Security Appliances

Security Appliances can be remotely deployed in minutes using zero-touch cloud provisioning. Security settings are simply synchronised across thousands of sites using templates. AutoVPN technology securely connects branches in 3 clicks, through a web-based dashboard.

- Zero-touch site to site VPN
- WAN optimisation
- NG firewall
- Intrusion detection
- Content filtering

MS Access Switches

Access and aggregation layer switches provide the backbone for networks of every size, combining secure, scalable, robust performance with an intuitive management experience.

- Voice and video QoS
- Layer 7 app visibility
- Virtual stacking
- PoE / PoE+ on all ports
- Remote packet capture, cable testing
